

Rapport de veille technologique

Projet Interreg ANTIRESI

Période 2 - Janvier à Juin 2025

1. DOMAINE DE LA SANTE.....	5
Antimicrobial hybrid coatings: A review on applications of nano ZnO based materials for biomedical applications.....	5
Innovative Antibacterial Polymer Coatings.....	5
VeroMetal® Antimicrobial	5
1.1. DISPOSITIFS MEDICAUX IMPLANTABLES	7
KISSMat : Une nouvelle génération de matériaux et de revêtements anti-infectieux - Laboratoire Réactions et Génie des Procédés.....	7
Bio-inspired biomaterial coating for enzyme responsive release of antimicrobial peptides	8
New antibacterial coating prevents bacteria on surfaces	9
Antimicrobial peptides and their application to combat implant-associated infections - opportunities and challenges	10
Smart bactericidal textile enabling in-situ visual assessment of antimicrobial activity.....	10
Zinc-Doped Antibacterial Coating as a Single Approach to Unlock Multifunctional and Highly Resistant Titanium Implant Surfaces.....	11
A new bacteriophage infecting Staphylococcus epidermidis with potential for removing biofilms by combination with chimeric lysin CHAPSH3b and vancomycin.....	11
CN120501925 A : Ectopic ossification-resistant artificial temporomandibular joint prosthesis modified by multiple controlled-release drug-loaded coating and preparation method thereof	13
CN120093999 A : Polypeptide-silver-manganese co-assembled nano-enzyme antibacterial coating for ureteral stent and preparation method of polypeptide-silver-manganese co-assembled nano-enzyme antibacterial coating	14
CN120022417 A : Nanotube coating with pH response controlled release function as well as preparation method and application thereof	15
CN119685823B B : Preparation method and application of titanium surface antibacterial coating	16
CN120114642 A : Surface treatment method for improving medical zinc/zinc alloy performance through multi-angle synergistic effect	17
CN119345456B B : Orthopedics endophyte with antibacterial and bone promoting characteristics and preparation method thereof.....	18
IN202411098464 A : Biodegradable drug-releasing vascular stent	19
CN119505332 A : Mineral-based composite antibacterial film material and method for improving antibacterial performance through surface treatment of mineral-based composite antibacterial film material	20
CN119345455 A : Titanium implant with osteogenesis-promoting antibacterial film layer and preparation method of titanium implant.....	21
CN119236170 A : Osteochondral repair 3D stent of insulin drug sustained-release microenvironment and preparation method of osteochondral repair 3D stent.....	22

CN221618355U U : Slow-release drug stent	23
CN118718086 A : Titanium-based implant abutment surface composite coating as well as preparation method and application thereof	24
CN118059308 A : Application of Piezo1 agonist Jedi in preparation of oral implant.....	25
CN117599249 A : Long-acting intelligent composite antibacterial coating with dual pH response function and preparation method thereof	26
CN117547655B B : Preparation method of drug slow-release coating on surface of zinc alloy implant	28
CN117248210B B : Titanium substrate surface photo-thermal activated carbon monoxide release antibacterial coating and preparation method and application thereof	29
CN115804871B B : Functional degradable medicine-carrying artificial bionic blood vessel and preparation method thereof.....	30
CN116288287 A : Preparation method of efficient piezoelectric coating on surface of titanium implant	31
IN-564364 B : A process and method for preparation hydrogels for prosthodontics to a new dimension in implantology and therefore	32
CN114366849B B : Bone repair material and preparation method and application thereof	33
WO2023103946 A1 : Procédé de préparation d'un revêtement à libération contrôlée et appareil de revêtement associé	34
CN114191617B B : Polyether-ether-ketone implant with controllable drug slow release and preparation method thereof.....	35
CN113041403B B : Bone repair n-HA/CS porous scaffold, preparation method and application	36
WO2021105872 A1 : Systèmes et procédés de formation d'un implant orthopédique antimicrobien .	37
CN112409922 A : Microvascular tube, preparation method thereof, slow-release antibacterial agent and antibacterial coating	38
1.2. DISPOSITIFS MEDICAUX NON IMPLANTABLES	39
Prévention des infections nosocomiales : La SATT Aquitaine investit 283 650 € dans la maturation d'un revêtement antimicrobien innovant.....	39
Recent Progress in Antibacterial Surfaces for Implant Catheters.....	39
Atomic-layer-deposition application for antibacterial coating of biomedical materials: surgical sutures	40
CN120463960 A : Photo-thermal controlled release nitric oxide anti-biological membrane hydrogel based on click reaction crosslinking and preparation method and application thereof	41
CN119950820 A : Method for firmly modifying surface of medical catheter with hydrophilic lubricating antibacterial hydrogel coating	43
WO202558357 A1 : Procédé de fabrication d'un aligneur dentaire transparent ayant une surface revêtue d'une composition de revêtement contenant des zwitterions	44
WO2024232769 A1 : Hydrogel de chitosane-cuivre, ses procédés de production, compositions le comprenant, procédés l'utilisant, une surface d'un objet, un tissu, un tissu non tissé recouverts de celui-ci et utilisations de l'hydrogel de chitosane-cuivre	45
CN218404576U U : Antibacterial composite yarn with drug sustained release function	46
WO2023129132 A1 : Dispositif d'accès sous-cutané revêtu et procédés associés	47
1.3. MATERIEL MEDICAL	48
Facile Spray-Coating of Antimicrobial Silica Nanoparticles for High-Touch Surface Protection.....	48

Strong antibacterial effect in coatings Hauzer Techno Coating	48
CN120137302 A : Flame-retardant antibacterial modified polypropylene and preparation method thereof.....	50
CN114015299 A : Preparation and application of composite nano antibacterial and antiviral coating	51
CN114437612B B : Deep-embossing-resistant antibacterial/antiviral coating composition and application thereof.....	52
2. BÂTIMENT	53
The complexities of antimicrobial textiles	53
Bacteria killing material creates superbug busting paint	55
KRION® Solid Surface · Un matériau aux propriétés uniques	56
Strong antibacterial effect in coatings Hauzer Techno Coating	57
HVAC Antimicrobial Coatings for Ductwork & Metal Cleaners.....	58
CN119242114B B : Antifouling paint for ceramic tile surface and preparation method thereof.....	60
CN119505619 A : Dual-sterilization and anti-sticking composite cross-linked coating as well as preparation method and application thereof	61
WO2023163290 A1 : Matériel de porte ayant une fonction de destruction de virus et de bactéries et son procédé de fabrication.....	62
CN112264274 A : Paint-sprayed antibacterial faucet and preparation method thereof.....	63
3. TRANSPORT	64
CN118460058B B : Marine ship antifouling coating and preparation method thereof.....	64
CN117645827B B : Temperature-sensitive low-surface-energy antifouling paint and preparation method thereof.....	65
WO2022160853 A1 : Procédé de préparation d'un revêtement antialissure permettant une libération contrôlée de coumarine sensible aux ultraviolets et une auto-réparation.....	66
4. ALIMENTAIRE - FOOD & BEVERAGES	67
Antimicrobial coating for reusable produce-handling cardboard containers using clay complexed with a quaternary ammonium compound (QAC).....	67
Evaluation of different antimicrobial polymeric coatings for food contact surfaces.....	67
CN119331291B B - Sustainable composite material for food packaging and preparation process thereof	68
CN222499852U U - Surface coating device for antibacterial packaging paper	69
5. AUTRES	70
ASCERA™: Antimicrobial Solutions Inspired by Nature Microban	70
Antibacterial Nanocomposite Ceramic Coating for Liquid Filtration Application.....	70
Antimicrobial, anti-smudge dual-functional silica coating via interfacial chemical modification	71
CN119505332 A : Mineral-based composite antibacterial film material and method for improving antibacterial performance through surface treatment of mineral-based composite antibacterial film material	72
CN118273160 A : Household paper with antibacterial effect and manufacturing method thereof.....	73
CN117210906 A : Anodic oxide film material for resisting microbial adhesion and preparation method of anodic oxide film material	74
CN11185170B B : Preparation method of nano-silver antibacterial composite material wrapped by	

nano-zinc oxide.....	75
----------------------	----
